Dear colleagues and guests,  
at the occasion of the International Symposium on Inflammatory Heart  
Disease in Marburg a number of anniversaries and historical moments  
are worth mentioning:

**24** years of cardiac research on heart failure and cardiomyopathies  
in Marburg

**25** years of the Working Group of Myocardial and Pericardial Diseases  
of the European Society, which I had the pleasure to be its founding  
chairman in 1987 together with C. Spry

**30** years of the German AG Entzündliche Herzerkrankung,  
for which H.D. Bolte and I served as founding chairpersons.

We are gratefully looking back to a number of international symposia on  
inflammatory cardiomyopathies, heart failure and pericardial diseases  
under the patronage of the European Society of Cardiology and the  
German Cardiac Society:

**1986** the 1st International Symposium on Inflammatory Heart Disease  
in Würzburg together with Kurt Kochsiek

**1990** the 2nd International Symposium on Inflammatory Heart Disease  
in Marburg together with Eckhard Olsen

**1994** the 3rd International Symposium on Cardiomyopathies in Berlin  
together with J.F. Goodwin

- all 3 proceedings were published in the European Heart Journal -

**2000** the 4rd International Symposium on Pericardial Diseases  
and Cardiac Inflammation

**2007** the 5th European Conference on Myocardial and Pericardial disease  
with additional Focus on Heart Disease in Women in Marburg

**2012** the 6th International Symposium on Inflammatory Heart Disease  
again in Marburg. Major contributions of these 3 symposia were published  
in HERZ/Cardiovascular Diseases.

Since this is the last international meeting that I will organize as chairman  
and director of the University Clinic of Internal Medicine and Cardiology of  
Philipps-University and UKGM GmbH Marburg, I should like to thank all  
the researchers and clinicians, who have contributed to make these  
conferences outstanding scientific events. I am also grateful to those who  
have given their patronage or their generous financial support over the  
years as partners from industry, private sponsors, the Verein zur  
Förderung der Kardiologie, Marburg, the city of Marburg and the German  
Ministry of Health with its Heart Failure Network. Most of all I am thankful  
to my teachers, all my collaborators and colleagues in Tübingen,  
Würzburg and Marburg, who have made basic and clinical research  
possible and exciting over more than 40 years.
